UNITED STATES BANKRUPTCY COURT NORTHERN AND SOUTHERN DISTRICTS OF MISSISSIPPI

STANDING ORDER DESIGNATING PRESUMPTIVE 11 U.S.C. § 1325(a)(5)(B) INTEREST RATE

The United States Supreme Court has held that the "prime-plus method" is the proper

method to determine the interest rate to be applied to a secured creditor's claim paid under the

"cram down" option of 11 U.S.C. § 1325(a)(5)(B). Till v. SCS Credit Corp., 541 U.S. 465, 124

S.Ct. 1951, 158 L.Ed.2d 787 (2004). The prime-plus method (now commonly known as the "Till

rate") begins with the national prime rate, which is then adjusted upward depending on certain

risk factors. Id. Both the Supreme Court and the Court of Appeals for the Fifth Circuit have

observed that the risk enhancement is typically 1% to 3%. Wells Fargo Bank, N.A. v. Texas

Grand Prairie Hotel Realty, L.L.C. (In re Texas Grand Prairie Hotel Realty, L.L.C.), 710 F.3d

324, 332 (5<sup>th</sup> Cir. 2013) (citing Till, 541 U.S. at 480). As the prime rate of interest is currently

5.0% per annum, an adjustment to the locally recognized *Till* rate is warranted.

Accordingly, for all chapter 13 cases filed on or after October 1, 2018, the presumptive

Till rate shall be 6.75%. The presumptive rate will be periodically reviewed and adjusted

depending on fluctuations in the prime interest rate.

This Order amends and supersedes all previous standing orders and memoranda setting a

presumptive Till rate in chapter 13 cases.

**SO ORDERED** this 17th day of August, 2018.
